

# Hornbills of the World

## A Photographic Guide

Mabula  
Ground  
Hornbill  
Project

ALL proceeds to Ground-Hornbill conservation

- The first monograph to the order Bucerotiformes for almost 20 years
- The first book ever to use photographs to identify all 57 species in tropical Africa and Asia, male as well as female, and almost all of the 75 subspecies
- Each species is featured across 1-6 pages with detailed text, multiple habitat photographs, and a map showing distribution to subspecies level
- Additional chapters collate the latest information available on hornbill evolution, habits, social life, feeding and breeding ecology, and conservation

Dr. Pilai Poonswad (Thailand), Dr. Alan Kemp (South Africa), and Morten Strange (Singapore) are all renowned hornbill experts and/or bird-book writers. Dr. Tim Laman (USA/ National Geographic) and 61 other world class photographers have made their best work available. *Hornbills of the World* was produced in co-operation with the Hornbill Research Foundation in Thailand, and proceeds will be donated to hornbill research and conservation.

212 pages, 400+ colour photos, colour distribution maps

R500.00 excl. Postage & Packaging
